For

No. 7 of the application,

In determining the criteria for this application, the response is as follows:

- 1) The special conditions and circumstances are a result of changes in the times when smaller lots and homes were built and the conditions are not a result from the actions of the applicant.
- 2) Literal interpretation of the code would work an undue and unnecessary hardship on the applicant in that the lot is unbuildable and prevents even a minimum of use of the property.
- 3) If granted, the variance is minimum in nature i.e. five (5) feet on the front lot width and approximately 645 sq.ft. in lot area, and would allow the reasonable use of the land for a single family home.
- 4) The grant of the variance will be in harmony with the general interest of the code and the variance will not be injurious to the zoning district or otherwise detrimental to the street, neighborhood or the community as a whole.
- 5) Plans show the new home would fit the lot within the normal setbacks.
